The Perfect Finish

When you buy a PVCu infill panel for your front door, you can rest assured you are investing in a quality product. PVCu doors are low maintenance and secure.

Every door is available in White or one of our woodgrain effects - Light Oak, Irish Oak, Mahogany or Rosewood. All woodgrain options are finely crafted to look realistic, but unlike wood, they are guaranteed not to crack, peel or fade; so you can create the warmth that wood offers, without the hassle. There is also a new range of foiled

colours such as the popular Anthracite Grey and Chartwell Green. You can also combine white and woodgrain finishes, so for example, you could have woodgrain on the outside to match the exterior features of your home, and white on the inside providing you with a neutral finish for your interior.

Foiled Colour Options

* Nearest match. RAL numbers are given in good faith but are for reference only. We take no responsibility for other materials not matching our finish.

Georgian Bar Options

Glazing Options

Triple Glazed - No backing glass option available ▲

This design uses three panes of glass and the design will be on the central piece. The obscure pattern does not always match other backing glass options.

Resin Bevel (BP) - No backing glass option available ●

Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable. The resin is glazed on the inside piece of glass facing outwards.

Bevelled Glass (DB)

Traditional handcrafted and each bevel is bonded to the glass with an optically clear resin, then overlaid with lead.

Stained Units (CD) (CL)

Combining traditional lead work with coloured film, these designs replicate that stained glass appearance. Coloured film may at times, vary slightly from the computer generated brochure.

Sandblasted / Etched Glass (TD) (DB)

Traditional and opaque in appearance but generally obscure, it does though leave various areas clear where the designs lines are.

Silver Grille (DB)

Our Silver Grille options feature attractive traditional motifs that are created using a highly polished chrome framework that is sealed within the double glazed units.

Due to the nature of the product, no liability can be accepted for the accuracy of colours or designs shown which are intended for guidance only. Our policy is to continually improve products, therefore methods, materials and specification may be changed from time to time without prior notice.

Amatis Collection

Stylish inverse moulding is the latest feature to be introduced to the PVC-U panel door and has proved to be popular with home owners, which is why we have extended our range to provide you with even more styles to choose from.

On most PVC-U doors, the mouldings are raised from the door. However, with the Amatis inverse collection, the mouldings recess into the door. This creates a more elegant, slimline look that resembles the traditional carved lines of timber, but still has the low maintenance benefits of PVC-U so you get the best of both worlds.
